

## A FACILITIES MANAGEMENT SERVICE

## METROLOGY SPECIALISTS

With over 30 years experience, Instrument Technologies, Inc., has lead in the field of instrument calibration service and training. We have structured our entire program around complying with and meeting the most stringent quality and regulatory requirements. Our technicians are highly skilled and meticulously trained and our calibrations are traceable to the National Institute of Standards and Technology (NIST). Our processes and documentation comply with all relevant FDA, ISO, GMP, cGMP, GLP, 21 CFR, USDA, HACCP, QC, and Six Sigma program requirements and we offer our services either on-site at your client's facility or off-site at ours.

## **A FACILITIES MANAGEMENT SERVICE**

METROLOGY SPECIALISTS

**I**nstrument Technologies, Inc., ensures that the instrumentation and devices your client uses in their laboratories and/or manufacturing facilities are accurate and operational. This in turn helps your client achieve production and business objectives, which allows their production managers to focus on getting product to market rather than dealing with shutdowns.

We all know maintaining instrumentation and devices that are critical to the production processes is important. This is why our technicians are highly skilled and meticulously trained. All our calibrations are traceable to the National Institute of Standards and Technology (NIST) and our processes and documentation comply with all relevant FDA, ISO, GMP, cGMP, GLP, 21 CFR, USDA, HACCP, QC, and Six Sigma programs.

The calibration activities we do contribute to a company's total operations objectives. Our metrology experts work with you and your client to ensure the calibration processes, procedures, and databases are compliant with appropriate regulations.
